## MATRIX

## INTRODUCTION

In each of the following question, a word is represent by only one set of number given as given in any of the alternatives.
The set of number is given in the alternatives are represent by two classes of alphabets as in the two given matrix. The columns and rows of matrix. 1 are numbered from 0 to 4 and those of matrix II nd from 5 to 9 ,
A latter from these matrices can be represented first by its row and then the columns e.g. in the matrix for the question 1 to 4 , R can be represented by $55,96,87,78,69$ etc. Similarly your have to identify the correct set for the word given in each question.
